EVT Certification Commission is proud to announce two New Exams

Ground Ladder Exam

- The new Ground Ladder Testing Exam will be offered beginning October 14, 2016. The exam tests the knowledge of a technician on the testing, maintenance and operation of ground ladders. The exam uses NFPA 1931 Standard for Manufacturer's Design of Fire Department Ground Ladders and NFPA 1932 Standard on Use, Maintenance, and Service Testing of In-Service Fire Department Ground Ladders as references. Learning Objective and Reference Materials List for Ground Ladder Exam is available at www.evtcc.org.

Driver Operator Exam

- At the request of the International Association of Fire Chief's Emergency Vehicle Management Section, who is sponsoring its creation, EVT has developed an exam that is targeted for the operator of the vehicle to do a daily/ weekly check that will satisfy the new requirements of NFPA 1911 Standard for Inspection, Maintenance, Testing, and Retirement of In-Service Emergency Vehicles 2017 edition. The Driver/Operator exam will be offered in Spring 2017 when the new NFPA document is available.

NFPA News by Stephen Wilde . . .

NFPA 1901 Standard for Automotive Fire Apparatus &
NFPA 1071 Professional Qualification Standard for EVT's
are both open for public inputs.

NFPA 1917 Standard for Automotive Ambulances
just closed first draft public inputs.

NFPA 1911 Standard for Inspection, Maintenance, Testing, and Retirement of In-Service Emergency Vehicles
has been balloted and is now open for NITMAM (Notice of Intent To Make A Motion) which is the last opportunity for the public to comment on the committee work. NFPA 1911 is expected to be out in 2017.

NFPA 1917 first draft inputs just closed and the committee will be meeting in October to work on the 100+ inputs. Then the document will be out for a second review by the public. Make sure that if you work on ambulances to stay abreast of the changes and submit your comments on the first draft. All first and second draft inputs are done electronically on the NFPA website by accessing the document from "Codes and Standards" and clicking on the "Next Edition" Tab. Then click on the link near the top of the page that says "the next edition of this standard is now open for public input." Once the document in opened, you can go directly to the section to make an input by either changing or adding new text, then follow the steps to submit it. It is very easy to make the inputs. You can save and submit later, if you want to go back and make more changes, you can do so.
This is how the standards gets updated and problems repaired. The committees must address all inputs and either resolve them or make modifications to the standard.

NFPA 1901 and NFPA 1071 are open for public inputs, this is the first step in the process of the revision cycles for these standards. You do not have to go to the meetings to have your input heard. If you have any issues with these two standards, now is the time to have your say. A task group will address the inputs and make a recommendation to the full committee on the input.

As Users of the NFPA documents,
your participation is extremely important.

The EVT Validation Committees use these standards each year to update the EVT exam questions and the learning objectives.
